

 **SUSPEND®**
Flexx

Affordable Innovation

Introducing
Suspend® Flexx - A New
Era of Formulation
Technology for Routine
Maintenance Application
of Complex Surfaces

Formulation type:

Solid Particle (SP) liquid concentration

Active ingredient:

Deltamethrin 2.45% w/w

Insecticide class: Class III

Pack size: 500 ml bottle

Revolutionary Solid Particle Technology

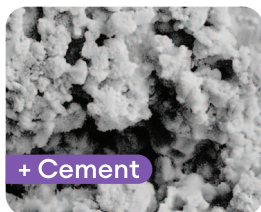

Turning Cutting-Edge Innovation into Practical Solutions

Suspend® Flexx uses a new solid particle (SP) formulation technology.

- + Superior performance, even on porous surfaces.
- + Even distribution and more bioavailability of active ingredient up to 12 weeks*
Enhanced effectiveness and longer-lasting protection compared to standard suspension concentrate (SC) formulations.
- + Flexible application rates provide a cost-efficient approach to pest control, tailored to your specific needs.

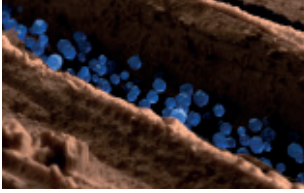

*May vary according to dilution rates, type of surface and environmental conditions

Porous surfaces are everywhere and represent a complex challenge to pest controllers

The current formulations don't perform well on these surfaces because the active ingredient gets absorbed and lost in cracks. The new Solid Particle Formulation technology uses particles that are 10x larger, keeping the active ingredient on the surface and preventing absorption.

Difference Between Solid Particles and Other Formulations

Suspension Concentrate
Most of the AI falls into the cracks of the surface.

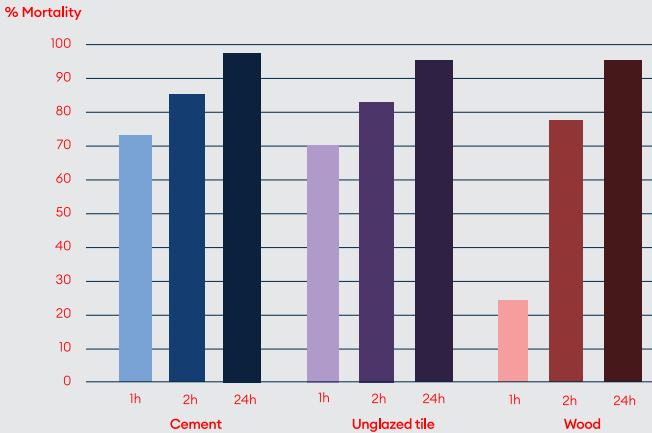

Microcapsulation
The AI still gets absorbed after released. Oil-based formulations can also stain.

Solid Particles
The AI is incorporated into large, solid particles to stay on top.

Suspend® Flexx Stays Elevated for Maximum Performance

Maintenance rate of Suspend®Flexx induced >90% mortality on different range of surfaces after one month of aging

Data on complex surfaces (after 1 month aging) – summary of cockroach and ant data (30 min exposure)

Application rates and delivery

Suspend® Flexx Dose Rates*			
Pest	Dose rate (ml/L)	Application rate (L/100 m ²)	Uses
Ants, cockroaches, and flies	10.0	5.0	High Rate Ideal for tough conditions like high pest pressure or challenging surfaces
	5.0		Standard rate Recommended for initial cleanout of pests such as cockroaches, ants and flies
	2.5		Maintenance Rate Best for ongoing maintenance after initial pest control treatments

*Before use, always read the label and product information first upon the product.

Affordable innovation

Suspend® Flexx is perfect for regular maintenance applications. It delivers excellent results even at low dose rates, offering cost-effectiveness options for pest management professionals

One bottle of Suspend® Flexx services up to **50x** with 2.5 ml/L dilution rate#

#Using a 4 L capacity compression sprayer
